

Dear Commissioners, As private citizens my family and I are very concerned that removing the restrictions on media ownership will limit our access to media that encourages debate which we think is important in protecting America's democracy. It is important to be able to know opposing opinions in order to explore how decisions are made. If we can not do this in America then we will regress to violations of the first amendment such as those that happened under the Smith Act of 1942 and the McCarthy trails. Please help us hear all the viewpoints not just those of the rich and powerful. Thank you,  
Mrs. Buck
